Christopher Brown [THD]  
[christopher\\_brown@homedepot.com](mailto:christopher_brown@homedepot.com)

# PURPOSE

The Windows Phone 7 Style Guide is an overview of the design elements and specifications needed to produce the application interface. Screen designs have been annotated with specific dimensions, style cues and typography guidelines to help developers create the interface accordingly in both portrait and landscape orientations.

The sections within the document outline creative elements at a high level (typography, colors, etc.) and specifications for production (model specifications, landscape details) at a detailed level. Developers should rely on this document to not only produce the design interface but also as a reference for rules & actions established in the creative phase of the project.

Please note that the screens represented in this document are a subset of all screens, called Key Screens. To fully understand the interaction model and user experience rules of the app, also see Windows Phone 7 Device Interaction Guide (DIG).

# HOW TO USE

Step 1- Use the DIG document to research the UI and similar pages of the screen you are developing. The DIG document is posted in Sharepoint on the mobile project. The key screens outlined in the DIG are carried over to this document to provide a more detailed look at the user interface from a design perspective.

Step 2- For an overview of how the Home Depot brand has been preserved and blended with the WP7 design style you can reference the color palette, typography, Buttons/CTA's sections.

Step 3- Utilize the Global header, Model specification, screen regions and design specifications to access detailed information on how the screens can be produced. In these sections you will find variables such as screen dimensions, pixel dimensions of elements on the screens, as well as specifications on transferring the design to a landscape mode.

Step 4- Use the Design Specifications section to understand the correct placement of any assets that are not dynamically produced

Step 5- Use the Animation section to understand transistions in the flow and how they should be iimplemented.

# REVISION HISTORY

Revision After	Description	Author/Date
V_1	Initital version.	C.R.B. 12/10/10
V_1.1	Updates. Revise captcha icons Fix button widths, pg. 12 Revise Done icon usage, pg. 15 Add line heights to type Revise page numbering Scoped Pano screen Removed nav image from narrow list Updated store listing	C.R.B. 12/15/10
V_1.2	Updates. Fixes to pano color documentation and hero sizing	C.R.B. 12/21/10
V_1.3	Updates. Add recent searches to search pivot Update Panorama My Store section	C.R.B. 01/04/11
V_1.4	Updates. Add Share by email asset Update PIP to add rating Update review Overall rating layout Update Shop landing pivots to add a recent searches pivot Update search screen recent viewed to be a PLP list Updates to home screen panorama	C.R.B. 01/07/11
V_1.5	Updates. Added a load more button to the CLP and PLP pages Store Locator and Action Screen have been up dated to make the City, State and ZIP search a form field within that screen Added annotation for pushpin text style on map Added star rating images	C.R.B. 01/18/11
V_1.6	Updates. Added 7 digit price and layout changes to PLP Added secondary pricing to PIP Added missing text input on edit cart for mCommerce  Updates to fix defects for QA	C.R.B. 01/18/11

# BUTTONS & CALL TO ACTIONS

## Button Styles and Uses

The buttons section outlines the various styles that are used to convey action to the user within the app. The buttons styles are outlined for development in both the native environment as well as ay web/JSP buttons that will need to be created dynamically. We will be outlining two processes for the buttons based on the different development environments.

## Calls To Action

On Radio Button

Off Radio Button

Search Icon

Used as a button to activate search from the header

Chevron

Used as a symbol of more information on specific text blocks ion the cart path

## Text Entry Box

Lipsum dolor sit amet.

Standard text entry box, always 100% when an action button is not on the same line. When container has a background color no stroke is used.

# NAVIGATION ELEMENTS & ICONS

## Primary App Navigation Icons

The diagram below illustrates Icons applied to the navigation bar.

## Nav Menu Icons and Their Usage

Standard app nav.

PLP and photo list nav.

PIP large image view nav

PIP pivot page nav

Map pivot page nav

# ASSET GLOSSARY

This section is meant to be a guide to graphical assets and their usage , the catalogue does not reference all graphical assets in the app but rather it identifies asset styles. Here is how we have broken down the asset prefix's: img denotes an image, bt denotes button ,and ico an icon. Also keep in mind the photo images demonstrated in these tables are not a full representation of the styles instead they show cropped versions of each asset.

Style	Asset Name	Usage
	ico-done.png	Used as a done icon in app nav.
	ico-plus.png	Used in forms to add items in cart
	ico-minus.png	Used in forms to remove items in cart
	ico-addtocart.png	Used in PIP pivots to add item to your cart
	ico-addtomylist.png	Used in PIP pivots to add item to your list
	ico-share.png	Used in PIP pivots to share by email
	ico-sortlist.png	Used in PLP and photo list to sort your list
	ico-narrowlist.png	Used in PLP and photo list to narrow your list
	ico-getdirections.png	Used in map nav to get directions
	ico-instore.png	Used in map nav to get in store map
	ico-setstores.png	Used in map nav to set your store.
	ico-enlarge.png	Used in PIP to enlarge product image.

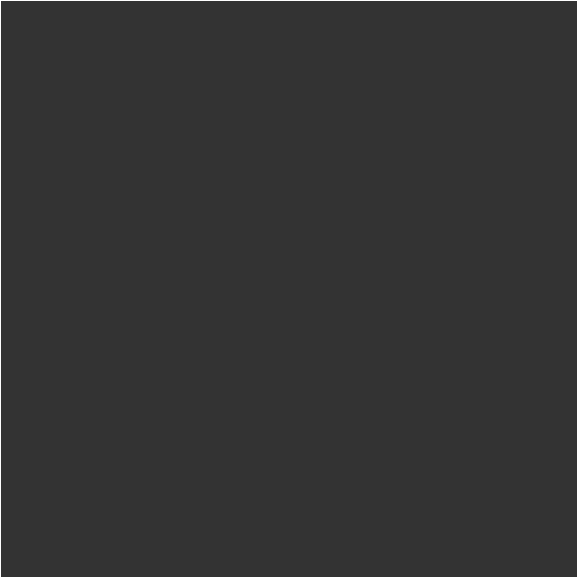

This section is meant to be a guide to graphical assets and their usage , the catalogue does not reference all graphical assets in the app but rather it identifies asset styles. Here is how we have broken down the asset prefix's: img denotes an image, bt denotes button ,and ico an icon. Also keep in mind the photo images demonstrated in these tables are not a full representation of the styles instead they show cropped versions of each asset.

Style	Asset Name	Usage
	ico-search.png	Header button for search.
	img-chevron.png	Found in mCommerce as a clickable region
	ico-radio-on.png	Used in mCommerce as a radio ON.
	ico-radio-off.png	Used in mCommerce as a radio OFF
	img-HDlogo.png	The home depot logo
	star-large.png.png	Star ratings on PLP
	star-small.png.png	Star ratings on PLP

# PRESET IMAGE SIZES

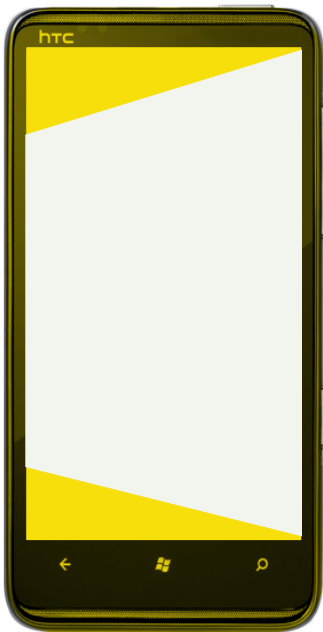

Outlined below are the preset image sizes. The images are not to scale.

<b>img-xsml.png</b> 50px		
<b>img-sml.png</b> 100px		
<b>img-med.png</b> 133px		
<b>img-lrg.png</b> 200px		
<b>img-xlrg.png</b> 300px		

# ANIMATION REFERENCE

## PORTRAIT & LANDSCAPE

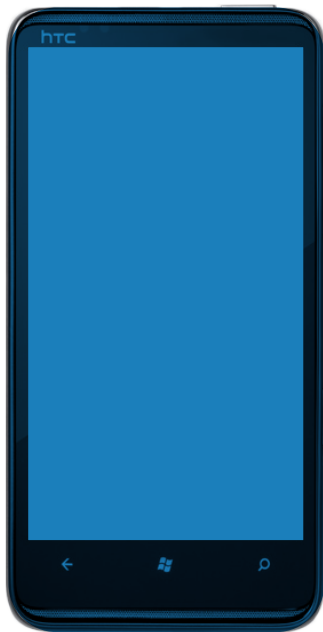

The following diagrams illustrate a series of preset page transitions used on the native windows phone 7 graphic user interface. Please use these as reference only. If you are curious enough to see the transitions in action, click on the video link below.
